PRODUCT DATA SHEET

AUSFRACOCIDE 200

Liquid, Broad Spectrum Biocide

DESCRIPTION

AUSFRACOCIDE 200 is an effective, low cost, anti-microbial agent for use in oilfield applications such as stimulation and fracturing fluids, drilling muds, workover or completion fluids, water treatment and waterflood applications.

APPLICATION

Based on the bacterial contamination, certain amounts of AUSFRACOCIDE 200 may be prescribed. For drilling muds, add approximately 0.2 gpt of PECOCIDE 200 in a thin stream to the mud pit while the drilling fluid is circulating. As the total volume increases, due to greater well depth, add additional AUSFRACOCIDE 200 to maintain the proper concentration. For stimulations fluids, water treatment, completions fluids or water flood applications, dosages will depend on the type and degree of contamination present. For these applications, recommended dosages can range from 0.05 gpt to 0.25 gpt based on feed regimen(s) and degree of contamination present.

ACTIVE INGREDIENT

Tetrahydro-3,5-dimethyl-2H-1,3,5-thiadiazine-2-thione (dazomet)	24%
Inert Ingredients	<u>76%</u>
TOTAL	100%

PRODUCT FEATURES

- Effective, low cost and easy to feed liquid formulation.
- Extremely effective against acid-producing bacteria.
- No compatibility issues with oxygen scavengers or friction reducers.
- Provides longer term kill than conventional oilfield biocides and covers a broad kill spectrum (breaks down into several biocidal compounds that prevent isolation of organisms).
- Non-ionic (does not interact with separation aids).
- Non-emulsifying.
- Low freezing point for cold weather application (< -4°F).

PROPERTIES

DENSITY (LBS./GAL.)	9.7
SOLUBILITY	Soluble in water
COLOR	Yellow to light green liquid
FLASH POINT	> 200°F (93°C)
PH	13.6

All testing should be conducted once product has been approved for use.
